Costa da Quinta, Joao Filipe TP2

Parallélisme TP2

28/10/2020

I know we did not need to do a pdf for this TP, but since my code does not work, I decided to do one to explain the issues:

1. MPI_Scatterv function was hard to use as there were not many examples found online, I managed to print the matrices to see the values, and some of the receiver values change, but not all of them, and I can't understand why.
2. MPI_Sendrcv also game me troubles, so I could not debug the iterations part of the code since no messages were sent.
